Our Products

Elevators

Elevator is used to travelling people or cargo from floor to floor with in building, elevator are parts of every tall building for lifting peoples and freights. The currently technology used in elevator are traction types, which is present most common in the world. This system is used with one side elevator car/cabin and other side for counter balancing weight, it is mostly safe and secure way of people travelling.

We as Pakistan Elevator providing elevator products with installation, maintenance, modernization , upgradation, testing and commissioning services for all type of elevators here in Pakistan. We are working for branded and our own semi imported elevator brand name of Pakistan Elevator.

Passenger Elevators

Passenger elevators has completely enclosed car/cabin that travel people within a special prepared shaft/hoist way. These type of elevators used for transport people from floor to floor in the buildings, we use gear less traction machines in our passenger elevator which are advance technology supports energy saving, low maintenance and require less space, various kind of solution for passenger elevator are available by us in Pakistan.

Cargo/Freight Elevators

Cargo Elevators are used for transport cargo, freight, tools and other components to all floors level in low or high rise buildings and industries. This products provide convenient access to all level industrial materials and ready to supply goods to client. In this way of product we use geared traction machine and provide all standard features with complete safety solution as per world elevator standard, we have our own fabrication workshop where we manufacture and fabricate elevator cabin/car, elevator doors and elevator steel structure as per customized designs, sizes and capacities which suits and support as per our clients need.

Platform Lifts

Platform lifts are the vertical transportation solution for both passengers and cargo, it can be installed in open space with one side supported wall, covered structure or shaft/hoist way. We deal in hydraulic platform lift which has imported hydraulic system, available in various type of platform.
